

Keith Huber is proud to introduce the The Knight™ PD air-mover capable of 6100 CFM & is designed to excel at a variety of wet/dry operations. This all-in-one machine incorporates the deep vacuum of the Knight™ for ultimate versatility & minimum project time. The Knight™ PD has the ability to pressure offload. The innovative Huber Master Control allows the operator to switch from wet to dry product at the push of a button, zero downtime. The combination of deep vacuum loading, patented 9 stage cyclone, & high air conveyance make the Knight™ PD ideal for moving sludges & dry product while reducing the frequency for clean out cycles
